

The UF/IFAS Agronomy Department invites
the UF/IFAS Community to attend a Special Seminar:

“Genetic Variation & Invasive Aquatic Plant Management”

with Speaker Dr. Ryan Thum

Tuesday, September 18,
2018

Presentation at 3:15 pm

In McCarty Hall B, Rm 3096

Reception to follow

In Rm 2108

For More Information on the
Agronomy Seminar Series,

Contact Dr. Babar at

mababar@ufl.edu

Dr. Ryan A Thum received his BS from Florida State University and his PhD from Dartmouth College. His research program focuses on the ecological genetics of invasive aquatic plants, with specific interest in the role that cryptic genetic diversity plays in invasiveness and herbicide response. He is currently a Research Professor at Montana State University’s Plant Sciences & Plant Pathology Department.
